

ABS LINEAR SCALE AT500-S/H

ABSOLUTE Linear Encoder for NC Control

CATALOG No. E4265-539

The slim-type AT500 series can contribute to the enhanced performance of NC machine tools.

AT500-S: Compatible with both vibration/impact resistance and temperature characteristics

AT500-H: Excellent in temperature characteristics and reproducibility of measuring accuracy

Overview

This Absolute Linear Scale has achieved the best-in-class response speed of 150m/min.

- Optimized for high-speed control of linear motors, etc.

Implementation of High-rigidity [AT500-S Series]

- Has achieved the best-in-class vibration resistance of 20G and impact resistance of 35G in Absolute scale units.
- Available in safety for high-accuracy machining, high-speed machining, and heavy cutting due to the accelerated rotation of the main spindle.
- Has improved in stability of the datum point of expansion with respect to temperature variations.
- Optimized for long-time machining of molds, complicated aluminum machining, and twin servo system control.

Implementation of High-accuracy [AT500-H Series]

- Measuring accuracy: $2+2L/1000$ (μm)
- Has improved in accuracy reproducibility and temperature characteristics and can select the datum point position of expansion from "Center/Right end/Left end" on the effective scale (can optimize the system according to temperature variations).
- Appropriate for use with an NC lathe or an electric discharge machine (contributing to the improvement of machining accuracy).

Structural Features

The scale is compatible with both vibration/impact resistance and temperature characteristics. [AT500-S series]

The combination of an optimized detector head structure and a scale main unit that employs multi-point elastic fixing with various analysis technologies has attained excellent vibration/impact resistance and temperature characteristics.

1. Example of detector head structure analysis (FEM analysis)

2. Vibration resistance characteristics

3. Example of impact resistance characteristics

Excellent Temperature Characteristics and Improved Accuracy Reproducibility [AT500-H Series]

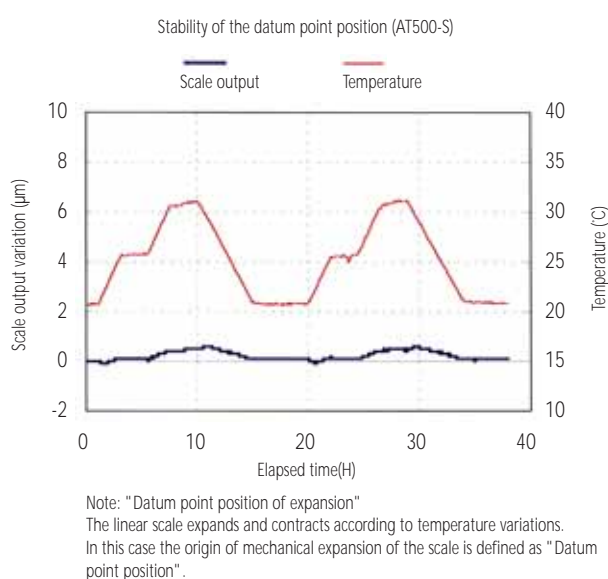

This series completely eliminates friction on the scale main unit, and employs an elastic fixing mechanism that has the "parallel leaf spring" function on both unit ends.

It has achieved excellent temperature characteristics and improved accuracy reproducibility.

4. Structure image

5. Temperature characteristics (example)

Specifications

Item	High-rigidity type	High-accuracy type	
	AT500-SC	AT500-HC	AT500-HL/HR
Mounting method of the scale main unit	Multi-point elastic fixing	3 or 5-point elastic fixing	3 or 4-point elastic fixing
Datum point position of expansion to temperature variations	Center of effective measuring length		End of effective measuring range HL: (+ side end), HR: (- side end)
Effective measuring length	100 to 2200mm	100 to 1000mm	100 to 350mm
Detecting method	Electrostatic capacitance type/photoelectric type composite ABS linear encoder		
Resolution	0.05μm		
Maximum response speed	150m/min (2.5m/s)		
Accuracy (20℃)	3+3L/1000 (μm) L: effective measuring length (mm)	2+2L/1000 (μm) L: effective measuring length (mm)	
Thermal expansion coefficient	8.5±0.5 (10 ⁻⁶ /℃)		
Operating temperature/humidity	0 to 45℃, 20% to 80%RH (no condensation)		
Storing temperature/humidity	-20 to 70℃, 20% to 80%RH (no condensation)		
Vibration resistance	20G (55 to 2000Hz)	15G (55 to 2000Hz)	
Impact resistance	35G (1/2Sin 11ms)	20G (1/2Sin 11ms)	
Power supply	DC5V ±5%		
Maximum power consumption	270mA		
Maximum sliding force	4N		
Protection level	Scale main unit: Equivalent to IP53, I/F Box: Equivalent to IP54		
Alarm display function	A scale alarm is indicated with an LED on the I/F Box.		
Air supply orifice	Present		

Scale Structure

Scale type

Scale type	Interface
AT553	High-speed serial interface for FANUC LTD.
AT543	High-speed serial interface "MELDAS" for Mitsubishi Electric Corporation
AT543A	High-speed serial interface "MELSERVO" for Mitsubishi Electric Corporation
AT573A	High-speed serial interface "MINAS" for Matsushita Electric Industrial Co., Ltd.
AT503 AT503A	Mitutoyo standard serial interface

* AT5□3□

Communication method
Blank: Full-duplex communication
A: Half-duplex communication

Interface Effective measuring length

AT5□3□ - □□□□ - □□

Scale main unit specification
S: High-rigidity type
H: High-accuracy type

Datum point position of expansion on the scale main unit *

C: Center of effective measuring range
L: End of effective measuring range (+ side end)
R: End of effective measuring range (- side end)
* L or R is appended to only the high-accuracy type.

System Configuration Example/Output Specification

AT553, AT543, AT573A, AT503, AT503A

[Note]

1. Connector A is to be prepared by the client.
2. Connector A and the grounding bar are to be connected by the client.
3. If a cable is added between the signal cable lead wires and the control unit (e.g. a feedback cable is added), the maximum cable length (the total length of the head cable, signal cable, and feedback cable) is to be 29m.

Output specification

AT553/543/503

Wire	Signal	Wire	Signal
Brown/red	+5V	Blue	REQ
White/black	GND	Purple	Phase A
Orange	_SD	Gray	Phase B
Yellow	SD	Shielded	FG
Green	_REQ		

AT573A/503A

Wire	Signal	Wire	Signal
Brown/red	+5V	Blue	RQ/SD
White/black	GND	Purple	Phase A
Orange	NC	Gray	Phase B
Yellow	NC	Shielded	FG
Green	_RQ/_SD		

* Phase A and phase B are used as test signals. Use the signals while leaving them unconnected.

* Connect the shield wire to the grounding bar.

AT543A

[Note]

1. Connectors A and B and feedback cables are to be prepared by the client.
2. Connectors A and B and the grounding bar are to be connected by the client.
3. An encoder cable made by Mitsubishi Electric Corporation can be used for the feedback cable.
Type: MR-JCCBL□M-H
A cable length (2, 5, or 10m) is indicated in "□".
*The feedback cable configuration differs depending on the system.
For detailed information, contact Mitsubishi Electric Corporation.
4. If a feedback cable is used, the maximum cable length (the total length of the head cable, signal cable, and feedback cable) is to be 29m.

Output specifications

Pin No.	Signal	Pin No.	Signal
1	MR (RQ/DT)	7	P5 (+5V)
2	MRR (*RQ/*DT)	8	LG (0V)
4	(DT)	9	F.G
5	(*DT)	3.6	N.C

* Applicable connector
Mini-Universal Mate-N-Lock Connector 9P (female) made by Tyco Electronics AMP
