

## MCubeMap

GROUND BREAKING 3D SURFACE ANALYSIS SOFTWARE

Ssk	-1.11
Sp	1.48
Sv	2.73
Sz	4.21
Sa	0.595

A new dimension of 2D/3D surface analysis: the user-friendly and highly efficient Mitutoyo MCubeMap software. It processes data gathered by surface roughness or vision measuring systems. MCubeMap boasts numerous outstanding features.

- › Clear imaging of analysed data using various computer graphics technologies
- › Supports the latest standards like ISO, JIS, DIN, ASME
- › Conforms to the most recent ISO 25178-2 3D surface texture parameter specifications, enabling parameter analysis such as height, functional, spatial, hybrid and volume etc.
- › Choice of many different languages, e.g. English, French, German, Spanish, Italian, Polish, Japanese, Chinese, Korean
- › Easy creation of graphical reports with layout function of free analysis results
- › Extensive data operations and analysis features
- › Excellent visualising, analysing and report options.

## Conforms to ISO 25178-2 3D surface texture parameter specifications

ISO 25178		
Height parameters		
<b>Sq</b>	µm	Root mean square height
<b>Ssk</b>		Skewness
<b>Sku</b>		Kurtosis
<b>Sp</b>	µm	Maximum peak height
<b>Sv</b>	µm	Maximum pit height
<b>Sz</b>	µm	Maximum height
<b>Sa</b>	µm	Arithmetic mean height
Functional parameters		
<b>Smr</b>	%	Areal material ratio
<b>Smc</b>	µm	Inverse areal material ratio

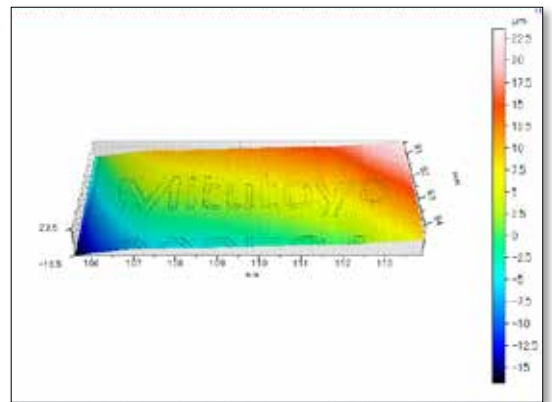

## 2) Analysing

- Advanced filtering techniques
- Extended 3D & 2D parameters sets (ISO etc.)
- Surface texture, geometry & morphology

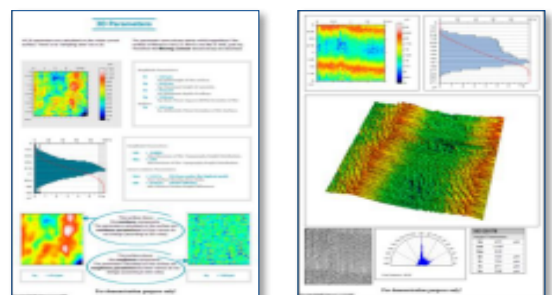

## 1) Visualising

- Overlay images on topography
- Create animated views
- View images in real 3D with glasses

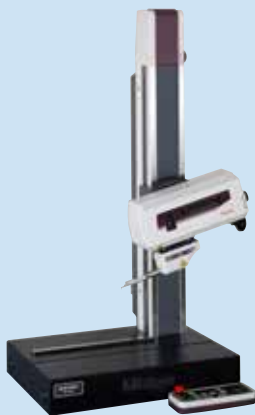

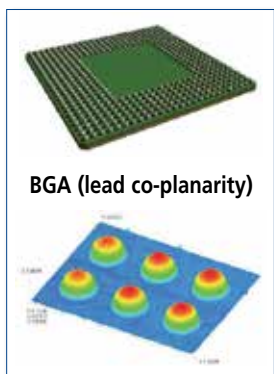

## 3) Reporting

- Publish reports in PDF & RTF-Word® formats
- Output all numerical results to Excel®
- Export high resolution images and pages

Measuring systems compatible with MCubeMap and application examples

**Whatever your challenges are,  
Mitutoyo supports you from start to finish.**

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
